FACT SHEET

BLISSCUITS

Blisscuits are an all-natural nutritious snack designed to give balanced health and energy while satisfying hunger and sweet cravings by using real food that helps to boost the immune system. Blisscuits are part of a new building category known as “functional food”; the nutrients come from whole natural and organic foods, providing superior health attributes. All four flavors are gluten-free, all-natural, contain cage-free egg whites, omega-3 fatty acids and more than 40% organic ingredients with no refined sugar or hydrogenated oils, making them a good option for those with food sensitivities.

HISTORY OF MARIEL'S KITCHEN

Mariel Hemingway created Mariel's Kitchen in 2008 in hopes of creating a new awareness for better health choices. After years of studying diet, nutrition and medicine, as well as utilizing a network of experts in the field, Mariel's Kitchen offers advice about what is good for people from the inside out by providing recipes, a cookbook, home and fitness tips and the new healthy snack, Blisscuits. Hemingway is on a mission to empower people to know what is best for their health through the personal choices they make – and through what is on their plate. For this reason, Hemingway has teamed up with co-developer Kevin Fortun, world renowned for his founding of Stockpot Soups, great recipes and fresh food packaging, to create Blisscuits.
